Certified Tax Rate = Prior year property tax collected / Current assessed property value (excluding new growth)

- Certified tax rate is calculated for each taxing entity annually
- Rates are calculated to yield the necessary budget revenue
- Rate is then applied to all properties including new growth

Property values may increase or decrease, but the actual dollar amount paid in property taxes should be roughly the same year-to-year unless there is an approved tax increase or decrease. Growth causes an increase in County Revenues, compensating for the cost of growth (more services required, cars on the road, etc.). The tax rate will “float” lower or higher depending on property value:

- If values go up, rates adjust down
- If values go down, rates adjust up
2023 Property value increase results in the certified tax rate being lower for almost all county taxing entities.

Property types have changed very little proportionately over the last five years for the county as a whole, small increases to Commercial and Residential Nonprimary.
The following is a summary of the Certified Tax Rates needing ratification by the council:
