The 29th Engineer Topographic Battalion, was one of two active topographic battalions, and is the oldest of all U.S. military mapping units. It was created on October 20, 1917. The responsibilities of the 29th included first, second, and third order geodetic surveys and photogrammetric control surveys; collection of maps produced by foreign mapping agencies; and collection of geodetic data and engineer intelligence data for the Army Map Service. At the time of Pvt. Sommers death, they were stationed in the Philippine Islands.

The Battalion’s distinctive unit insignia is as follows: the blue shield with the red saltire is from the arms of Langres, Haute Marne, France, and recalls the location of the headquarters of the 29th Engineers and the Base Printing Plant during World War I. The white piping along the red diagonals gives the Engineer colors. The four stars indicate the four major operations with the 29th Engineers are credited as follows: Aisne-Marne, Toul Sector, St. Mihiel, Meuse-Argonne. The red five bastioned fort indicates the number of the parent organization (5th Engineers), and also recalls the Santiago Campaign of 1898. The crescent symbolizes the fighting against the Philippine Moros.
